# Next Mobile Solutions

Data collection company

The Czech company **NEXT MOBILE SOLUTIONS** has developed a unique on-site feedback technology - **AskNow Instant Feedback**. Since the inception it has been successfully implemented and used in various areas of everyday and working life. It is a technology for capturing and transmitting immediate evaluated responses from customers or employees directly from the site and in real time. Attractively designed feedback terminals with a questionnaire provide an opportunity to express and capture the undistorted opinions of customers directly from a specific location. Customers insights reach responsible persons, who can then work or react directly to the feedback. Thanks to that, your company can keep moving forward and efficiently improve its services.

**NEXT MOBILE SOLUTIONS** has added another unique platform called **AskNow Marketing**. This become very interesting in the field of marketing. Interactive terminals offer a unique opportunity to create interactive relationship with current and future customers. They enable not only interactive advertising directly in places with customers move, but also the possibility of further sales support, promotion which can help to stay ahead of competition etc.

ask  now<sup>®</sup>

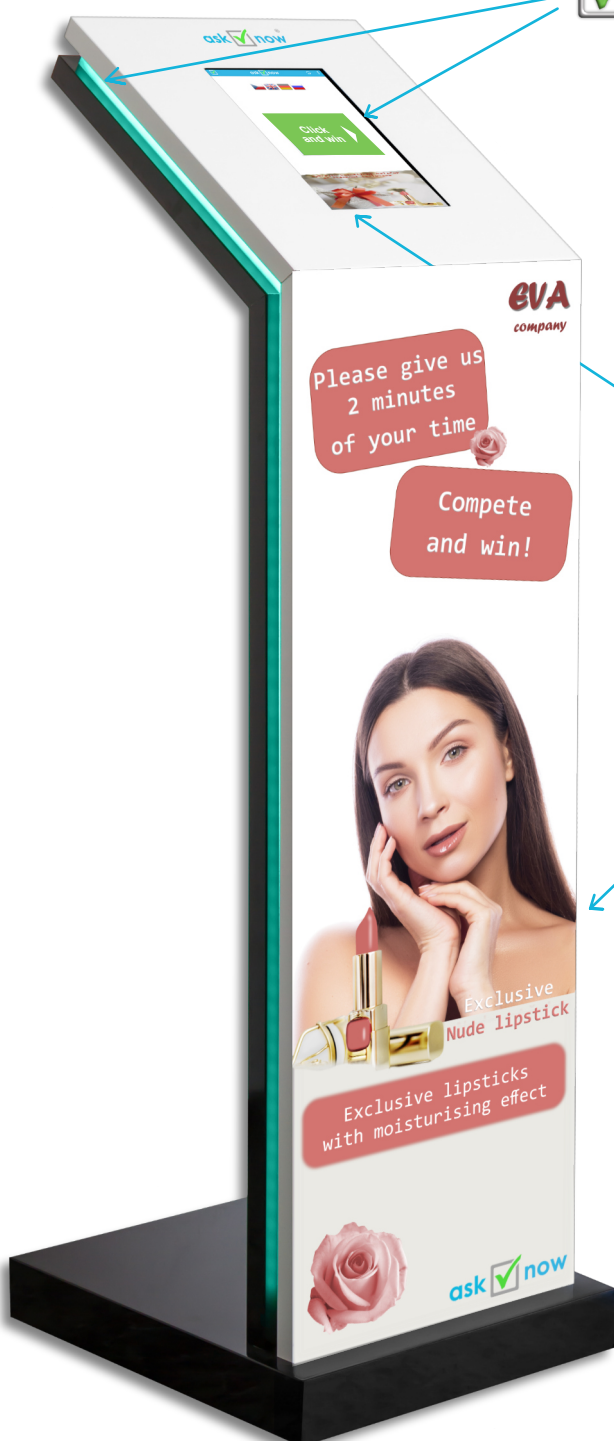

# Feedback technology connected with marketing

Our AskNow technology is a comprehensive service that finds use in any field of business: medical facilities - hospitals, blood centres, polyclinics, spa resorts, hotels, water parks, exhibitions, car dealerships, gastro services, airports, shopping centres, conferences, schools, offices etc.

## Terminal with tablet:

Attractively designed terminal is lit on both sides with LED strips. Inside the terminal is placed an built-in tablet on which the AskNow system is installed. This serves to easily obtain any kind of feedback in the form of a tailored questionnaire. For this purpose it is always created and tailored to the client's requirements.

At the same time, an animations can be installed in the tablet (either small or full screen) that further promotes the use of terminal as well as a certain product or service of the given company.

The front side of the terminal is protected with Plexiglas shield. Behind that shield is put an attractive poster, that serves the marketing intention to further promote an offer for a specific product or service. It also very well support getting much more attention to filling out a questionnaire. Customer are much more eager to provide their contact and personal data if they can enjoy possibility of winning.

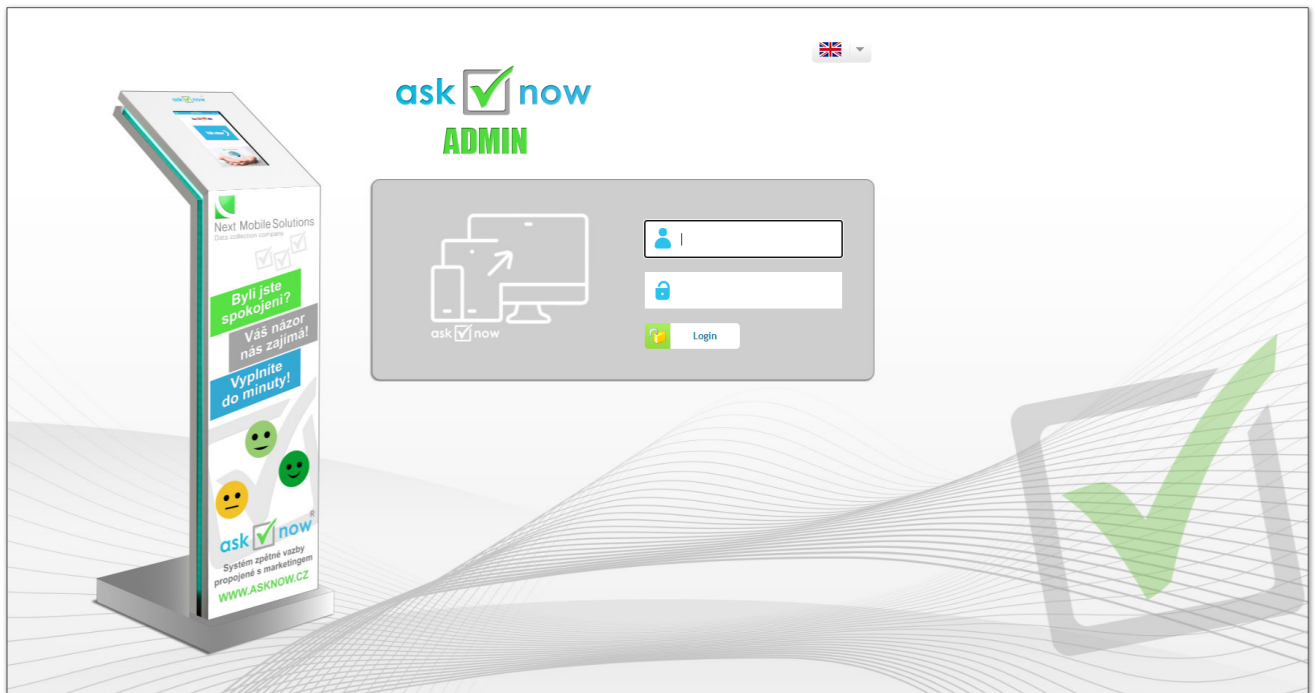

The terminal needs to be just plug into the electricity and WIFI connection.

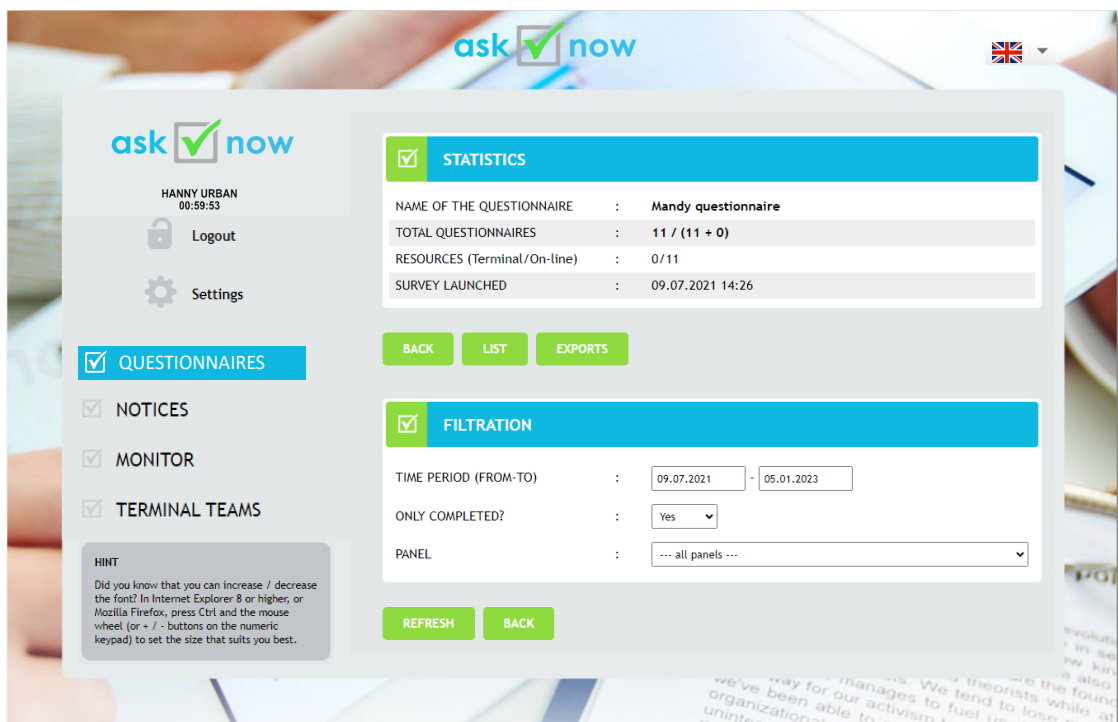

## ADMIN AskNow:

The administration contains complete and clear access to the statistical data obtained, both from all the questions from the questionnaire and also the provided personal data within the survey of the respondents, such as name, email address, telephone, etc.

- ✔ Only authorized users from each given company have access to Admin (they will receive access logins with passwords data), can access the data. The user can view the resulting data not only on a computer, but on any mobile devices (tablet or mobile phone) The AskNow website is fully responsive.

- ✔ The on-going instant results and data can be anytime viewed in Admin. The client can filter the data in various interactive ways, e.g., results for a certain period (quarterly, etc.)

Examples of displaying questions on PC with result data including graphs:

## Tablet with questionnaire:

-  The start screen of AskNow on the tablet offers an intuitive button to start the questionnaire. The questionnaire can be easily run in several languages, if there is a need. The respondent clicks on the appropriate flag on the screen and the language of the questionnaire will then change according to the selected choice.

-  The questions are clear, with help text if needed, and they can also have photos.
